CONTENT HIGHLIGHTED

- Delta Lead Scientist and Delta Independent Science Board recruitments
- Live-tweets from the 2019 Delta Invasive Species Symposium: Remote Sensing Applications for Management and the August Council meeting
- California Sea Grant State Fellow 2020 application period and mini-profiles of former state fellows to show where they are today
- Science Friday topics: Predators of the Delta, river processes, pollinators in the Delta, thermal tolerance of plants and animals in the Delta

TAKE HOME MESSAGE

A time-lapse GIF of sediment deposits creating an oxbow lake to demonstrate river processes for Science Friday was a big hit, earning 5,554 impressions and 128 engagements. This affirms the usefulness of GIFs, time-lapses, and other multimedia for reaching our audiences and driving home takeaway messages. We also hit a milestone of 2,600 followers on Twitter this month!

TOP TWEET: 5,554 impressions

Top Tweet earned 5,554 impressions

When a river takes a turn, it deposits sediment on the inside bank + erodes the outside bank. Over time, this process naturally shifts the path of a river.

Shout-out to satellites for providing awesome **#timelapse** imagery of this process!

A link shared from California Sea Grant reminding folks that there was still time to

apply to our four 2020 state fellow positions reached 415 people, earned seven likes, and three shares. While only a small piece of our social portfolio, Facebook remains useful for cross-promotion purposes.

TAKE HOME MESSAGE

We increased the number and variety of our posts in August and focused on our overall

grid aesthetic using the content planning tool Planoly. A push to follow and engage with other Delta and water policy-related accounts this month helped double our profile visits and grow our number of followers, pushing us closer to our goal of 1,000 followers by year's end.

A feature highlighting the experience of former California Sea Grant State Fellow

Stephen Pang earned 16 likes and engagement from colleagues at his current employer, Stantec. This response shows the importance of engaging both individuals and companies on LinkedIn to share the work and opportunities created by the Council.
